BJC Tower Demo
Site Visit Notes

One-quart of the rotomill lot will be made available for contractor storage.

A traffic diversion plan is required.

The ATCT warning light must remain active until the height of the tower is lower than the height of the Terminal Building.

Any light ballasts not accounted for will have to be pulled down and evaluated for hazmat.

Any chemicals left behind will be collected and disposed of by the FAA.

The contractor shall box-up the "Exit" signs for the FAA. The FAA will then take custody of them.

The bulk of the asbestos containing materials is in the floor tile and window putty.

The FAA has no knowledge of the block or block filler having ever been tested for asbestos.
